Chapter I

General informations

The project contract upload do not require you to do anything on their project page. Once you've found a company in which you will do your apprenticeship, create and upload your contract **BEFORE THE STARTING DATE** and both projects will be validated.

Please make sure that the contract starts at least one day after the day you upload the contract (one week is the safe bet) else your contract isn't valid. Once you and the company have signed the contract, upload it on companies and the school will sign it.
