# Chapter I

## General informations

The projects duration and contract upload do not require you to do anything on their project page. Once you've found a company in which you will do your internship, create and upload your contract **BEFORE THE STARTING DATE** and both projects will be validated.

Please make sure that the contract starts at least one day after the day you upload the contract (one week is the safe bet) else your contract isn't valid. Once you and the company have signed the contract, upload it on companies and the school will sign it.

Your duration mark will range from 100 to 125 depending on the duration of the internship. If your internship is 4 months-long, your mark will be 100. For 6 months, you will get 125. This will impact your final mark for the internship.
